

MD MASOOM

Full Stack Web Developer | MERN Stack | React | Node.js

Patna | mdmasoom9060@gmail.com | 9262548109 | Dev Portfolio | /in/mdmasoom459 | Github

Summary

Passionate **Full Stack Developer** with a strong foundation in building scalable web applications using the MERN stack. Completed projects like an Airbnb-like platform and a job portal, leveraging technologies such as React, Node.js, and cloud services. Strong problem-solving skills with over 350 coding challenges solved on platforms like LeetCode. Eager to contribute to collaborative teams and take on complex technical challenges.

Education

B.Tech, Electronics and Communication Engineering Bhagalpur College of Engineering (2020–2024)

- CGPA: 8.09/10.0

Intermediate, Science S.R.P.S +2 School, Patna (2018–2020)

- Percentage: 77.6

Internship Experience

Salesforce Developer Virtual Internship – Remote

Dec 2023 – Jan 2024

- Built CRM applications using Salesforce tools with custom objects, workflows, and Apex classes in a simulated enterprise environment.
- Designed and integrated user interfaces using Salesforce Lightning for improved user experience.

Projects

Mystery Message

[Live](#) | [GitHub](#)

- Built a full-stack messaging app using Next.js, TypeScript, and Tailwind CSS.
- Integrated Gemini 1.5 Pro to generate smart, context-aware message suggestions.
- Secured user flows with NextAuth, validated forms with Zod, managed auth states with MongoDB, and enabled account recovery.

Functional Airbnb clone - Wanderlust

[Live](#) | [GitHub](#)

- Developed an Airbnb clone using the MERN stack with secure auth, user sessions.
- Built RESTful APIs with Express.js/Node.js for CRUD functionality and used MongoDB for data storage.
- Integrated image uploads, map rendering, and listing creation/editing features with review.

Blog Application

[Live](#) | [GitHub](#)

- Developed a blog platform using React and Tailwind CSS with smooth navigation via React Router.
- Integrated Appwrite for authentication, database, and storage to manage content and uploads.
- Used React Redux for state handling and React Hook Form for form processing.

Job Spark

[Live](#) | [GitHub](#)

- Developed a MERN-based job portal featuring dual roles for recruiters and students.
- Built job creation, real-time filtering, profile updates, and applicant tracking functionalities.
- Used Redux and Shadcn/Tailwind UI for responsive design and state management.

Skills

Languages Core: HTML, CSS, JavaScript, Python, C/C++ (DSA), TypeScript (basics)

Frontend: React.js, Next.js, React-Router-DOM, Redux, Tailwind CSS, EJS, Shadcn UI, Framer Motion, React-Hook-Form

Backend: Node.js, Express.js, REST APIs

Databases & Cloud: MongoDB, MySQL, Cloudinary, Appwrite, AWS EC2 (Linux)

DevOps & Tools: Git, GitHub, Postman, Axios, OOP, Zod, Joi, NextAuth, Linux (DevOps), WSL

Certification

Introduction to Networking from Cisco.
